

CLAIMS:

1. A spectacle frame comprising:
a frameless lens or lens frame,
5 an arm,
a clamp bearing upon the arm and temporarily securing
the arm to the frameless lens or lens frame and attached
hingedly to an arm mounting of the frameless lens or lens
frame.
- 10 2. The spectacle frame of Claim 1 wherein the clamp
comprises a hinge plate at one side of the arm that is
connected by a pivot pin to the arm mounting of the
frameless lens or lens frame, and a clip at the other side
15 of the arm co-operating with the hinge plate.
3. The spectacle frame of Claim 1 wherein the arm has a
transverse aperture therethrough and the clip has a tab
that
20 extends into the aperture.
4. The spectacle frame of Claim 3 wherein the arm has an
end recess adjacent to the aperture and the clip has a
spacer that extends into the recess.
- 25 5. The spectacle frame of Claim 4 wherein the hinge plate
has a stopper that extends into the recess of the arm
alongside the spacer.

6. The spectacle frame of Claim 1 wherein the clip has an extension that bears against the arm mounting to define a pivot limit of the arm.
